

## Citrus Commerce Center

Fontana, California

### Stormwater Infiltration Solution With 300k ft<sup>3</sup> of Storage

Citrus Commerce Park is a new logistics warehouse complex that provides over 1.8 million square feet of high-cube warehouse/distribution uses and a soccer park in Fontana, California.

Designed by Thienes Engineering, the development required significant hydromodification due to the substantial increase in impervious surface. Six storm chamber beds were designed under parking/traffic areas in between the warehouse buildings in order to maximize land usage on the project site.

S&S Douglas installed over 1,500 HydroStor 180 chambers in 8 working days providing nearly 300,000 cubic feet for storage.

**Project Owner:**

Citrus Avenue LLC

**Engineer:**

Thienes Engineering, Inc

**Contractor:**

S&S Douglas Pipeline

**Installation Date:**

July, 2016

**Technical Description:**

1,569 HS180 stormwater chambers
