

# GOLDLINE® G2 FACT SHEET

## WATER MANAGEMENT / SINGLE-WALL

### GOLDLINE® G2

Goldline® G2 is the second generation of our single-wall product. It has been re-engineered based on customer feedback to meet the rising demands of today's drainage contractors who are using advanced technology, high speed plows and installing well into the winter months.

#### Benefits

- Designed for cold weather installs
- High performance in all weather conditions
- Easier handling – less curling off the stringer
- Easier coupling – less force needed to join ends
- Safer installation – less manual handling
- Increased structural performance – more confidence

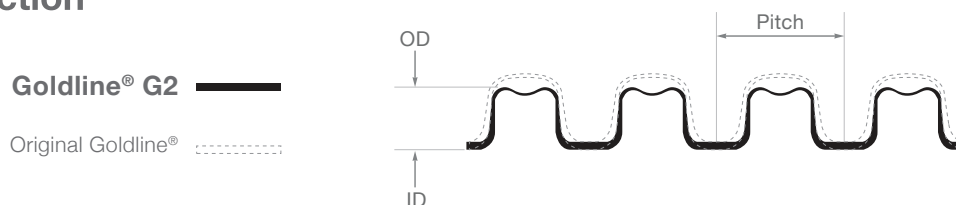

#### Details

	Strength* (Pipe Stiffness)	Flexibility	Sizes	Approx. Weight/Ft	Coil Length
<b>Goldline G2</b> Compared to Original Goldline	<b>30% stronger</b>	<b>80% more flexible</b>	<b>8"   12"   15"</b>	<b>same</b>	<b>same</b>

\*Strength values are derived from pipe stiffness (sometimes called 'crush strength') values which are determined by ASTM lab tests. Pipe stiffness has a strong influence on burial depth and live loading capabilities. The higher the pipe stiffness, the stronger the pipe.
