

STORMWATER SOLUTIONS / FOUNDATION DRAINAGE

PRODRI™

Foundation Waterproofing Made Easy

PRODRI™ is a high-density polyethylene (HDPE) studded membrane. It is ideal for damp proofing and drainage in basements and underground walls. PRODRI creates an air gap between the soil and foundation wall and hinders moisture penetration.

Features

- 100% HDPE Recycled Content
- Weight 685 g/m2 – Best in Industry
- USA Manufactured
- ICC - US code approved
- 20 Year Product Warranty

Available Sizes & Accessories

Item	Number
4' x 65.5' PRODRI™	PD4X655
6' x 65.5' PRODRI™	PD6X655
7' x 65.5' PRODRI™	PD7X655
8' x 65.5' PRODRI™	PD8X655
4' x 50' PRODRI™ GEO	PDGEO4X50
6' x 50' PRODRI™ GEO	PDGEO6X50
8' x 50' PRODRI™ GEO	PDGEO8X50
4' x 50' PRODRI™ 6000	PD60004X50
6' x 50' PRODRI™ 6000	PD60006X50
8' x 50' PRODRI™ 6000	PD60008X50
Fastener - 50ct	PDFSTR
6.5' Edge Moulding	PDMDL
Plug - 200ct	PDPLG

PRODRI™ GEO

Available with Geotextile

PRODRI™ GEO is a high-density polyethylene (HDPE) studded membrane bonded to a special PP fabric. It is ideal for drainage in basements and underground walls in residential and commercial applications.

PRODRI™ 6000

Commercial Grade

PRODRI™ 6000 is an extruded high-density polyethylene (HDPE) membrane, bonded to a filter geotextile.
